1   Purpose of this guide

This guide will provide you with a comprehensive understanding of the i-Connect multiple payroll provider (MPP) payroll extract file specification, including each of the data items that need to be submitted to your administering authority every pay period.

Data items are mandatory, conditional or optional for i-Connect data processing. Your administering authority may insist on some of the conditional or optional data items being provided.

1.1   Further reading

If you are an employer:

- Refer to the i-Connect User Guides for Employers for further information regarding the i-Connect service.

    - Logon

    - Reporting

    - Onboarding

    - Online Return

    - File Upload

If you are an administering authority:

- Refer to the User Guides for Employers listed above, and the i-Connect User Guide for Administering Authorities.

Please email support@i-Connectdata.co.uk if you have not received copies of the documentation.

2   Preparation

2.1   Record matching

i-Connect will automatically match, where possible, each separate post on your payroll system to a corresponding record on your administering authority's pensions administration system (referred to throughout this document as 'the target system'). The matching process uses employees' National Insurance numbers, together with a unique payroll identifier.

2.1.1   Unique payroll identifier

A unique payroll identifier must be present for each payee/post on the MPP payroll extract file. This key can be a combination of fields held on the payroll system, for example, payroll reference, employee reference and post number. There are three 12-character fields available on the MPP payroll extract file to output the unique payroll identifier:

- Payroll Reference 1 (Data Item 3)

- Payroll Reference 2 (Data Item 4)

- Payroll Reference 3 (Data Item 5)

These three fields provide you and your administering authority with the flexibility to create a unique payroll identifier in a single field or across multiple fields.

The examples in the table below use the following information:

- National Insurance Number: AA123123A

- Payroll Reference: 555444

- Post Number: 144-543

Unique Payroll Identifier	National Insurance Number	Payroll Reference 1	Payroll Reference 2	Payroll Reference 3
Single Field	AA123123A	555444144543		
Multiple Fields (2)	AA123123A	555444	144-543	
Multiple Fields (3)	AA123123A	555444	144	543

Aquila Heywood

Each of the three payroll reference fields corresponds to a specific field on the target system. Your administering authority will provide you with their specific field-level matching requirements as part of the i-Connect implementation process; please contact them as soon as possible, if this information has not been provided.

The selected matching method must be consistent for all records on the MPP payroll extract file.

3   Extract file creation preparation

3.1   File format

All MPP payroll extract files uploaded into i-Connect must be saved as comma-separated-value (CSV) files. Files not in this format will be rejected during the upload process.

Fields containing commas must be embedded within a set of double quotes (commonly referred to as 'text qualifiers'), to maintain data integrity. For example, a data entry in Address Line 1 (data item 16), with a comma present, would be output as:

```
"Dun Roamin, Dun Campin"
```

3.2   Header row

A header row must be present on the first row of each MPP payroll extract file, to describe the i-Connect data items. Failure to include a header row will result in the first record on the file being omitted from processing, as i-Connect always assumes the first row is the header.

A sample header row is:

```
FILE_REF,NI_NUMBER,PAY_REF_1,PAY_REF_2,PAY_REF_3,ADD_LINE_1,AD
D_LINE_2,ADD_LINE_3,ADD_LINE_4,ADD_LINE_5,POSTCODE,EMAIL_ADDRE
SS,TELEPHONE_NUMBER,MOBILE_NUMBER,WORKS_PLACE_NAME,WORKS_ADD_L
INE_1,WORKS_ADD_LINE_2,WORKS_ADD_LINE_3,WORKS_ADD_LINE_4,WORKS
_ADD_LINE_5,WORKS_POSTCODE,WORKS_EMAIL_ADDRESS,DATE_OF_LEAVING
,PAYROLL_PERIOD_END_DATE,ADDITIONAL_CONTRIBUTIONS_1,ADDITIONAL
_CONTRIBUTIONS_2,SUSPENSION_START,SUSPENSION_END,FILLER_1,SMP_
IND,SURNAME,FORENAMES,GENDER,DOB,MARITAL_STATUS,TITLE,FILLER_2
,AUTO_ENROLMENT_QUALIFYING_EARNINGS,ANNUAL_PENSIONABLE_SALARY,
PENSIONABLE_PAY,EFFECTIVE_DATE,DATE_JOINED_PENSION_SCHEME,JOB_
TITLE,PART_TIME_HOURS_EFFECTIVE_DATE,PART_TIME_HOURS,PART_TIME
_INDICATOR,WHOLE_TIME_EQUIVALENT_HOURS,EMPLOYEES_MAIN_SECTION_
CONTS,EMPLOYERS_CONTS,SCHEME_CONT_RATE,OPT_OUT_DATE,OPT_IN_DAT
E,MAIN_SECTION_CUMULATIVE_PEN_PAY,5050_SECTION_CUMULATIVE_PEN_
PAY,FTE_FINAL_PAY,CUMULATIVE_EMPLOYEES_MAIN_SECTION_SCHEME_CON

TIVE_SCAPCs,CUMULATIVE_APCs,EMPLOYEES_5050_CONTS,CUMULATIVE_EM
PLOYEES_5050_CONTS,SCAPCs,APCs
```

The column names do not have to be identical to those above, but the field ordering must be the same as the order specified in section 5.

Aquila Heywood

3.3 Duplicate records

All records in the i-Connect MPP payroll extract file must be unique. Uploaded files will be rejected if there are one or more records containing duplicate combinations of National Insurance Number and the Unique Payroll Identifier.

3.4 Other MPP payroll extract file considerations

- The order of the data items must match the order specified in the file layout.

- The payroll period end date (data item 24) must be the same on all records.

- Blank rows must not be present in the MPP payroll extract file.

- Ensure all leading zero values remain if the file has to be converted to CSV format.

- Ensure all transactions processed after the payroll cut-off date are included on the i-Connect MPP payroll extract file report. This must include new starters, leavers, post changes and so on.

- Part-time hours must be pro-rated for term-time employees.

- Negative values are indicated by a minus '-' character at the beginning of the data field (for example, '-115.64').

Aquila Heywood

4 Uploading data

4.1 Preparing to upload data

Please read the i-Connect User Guide for Employers and ensure that you can answer 'Yes' to the following questions before attempting to upload any data into i-Connect:

- Is the file in the correct format?

- Have you used the correct payroll-period-end date?

- Are all the records unique?

- Has your administering authority provided you with a username?

- Have you completed the i-Connect registration process?

- Have you created a test payroll in i-Connect?

4.2 Processing times

The following table provides approximate timings for processing MPP payroll extract files in i-Connect. The first stage, 'File Upload/Employment Check', checks the structure of the file, validates the data and checks whether any payees have been deleted from the target system by the administering authority. The second stage, 'Target System Update', uploads the detected events to the administering authority's target system:

Number of Records	Approx. Processing Times (mins)	
	File Upload / Employment Check	Target System Update
1,000	15	20
2,000	20	40
5,000	30	100
7,500	50	150
10,000	70	200
15,000	100	300
20,000	120	400

Note: Processing times can vary depending on Internet speeds and concurrent usage.

5   i-Connect multiple payroll extract file specification

Item	Data Item	Description	Maximum Number of Characters	Mandatory/Optional
1	FILE REF	Multiple payroll provider file reference	10	**Mandatory**
Example:	A123456789			
Notes:	Please enter a unique file reference for each separate employer included on the multiple payroll extract file. The file reference must be present for each record on the file. **This data item must be completed.**			
2	NATIONAL INSURANCE NUMBER	National Insurance (NI) number of the employee	9	**Mandatory**
Example:	AB123456C			
Notes:	Please enter the employee's NI Number. The NI number is used in conjunction with one or more of the payroll reference fields (items 2 -4) to identify the correct record on the administering authority's target system. Please contact your administering authority if any of the employees does not have a National Insurance number, as this is a mandatory field on the target system. **This data item must be completed.**			
3	PAYROLL REFERENCE 1	An additional unique identifier. Generally, this is the employee's payroll number with the current employer. It should be a unique identifier for each post in your organisation.	12	**Conditional***
Example:	134-0547			
Notes:	Please enter a unique identifier to match the post to the correct target system record, for example, Payroll Reference Number. Please contact your administering authority to confirm whether this unique identifier should be placed in Payroll Reference 1, Payroll Reference 2 or Payroll Reference 3. If this field is not used as unique identifier, it can be used to store additional payroll identification information for new starters, such as Post or Contract Number. ***Mandatory if the administering authority specifies this field as a unique identifier**

7   Frequently asked questions

We have compiled a list of common questions and answers below; please contact the i-Connect support desk if you have any other questions or comments relating to this guide:

1. Should I include all payees on the payroll extract file, including those employees who have previously opted out of the scheme?

   Whether you include opt-outs on the payroll extract file is entirely up to you and your administering authority, and the inclusion of opt outs should be agreed during the implementation stage.

   If you do decide to include opt-outs, the difference between the 'Opt Out Date' (data item 51) and the 'Date Joined Scheme' (data item 42) must be less than three months. This is because i-Connect will create new starter records on your administering authority's target system for each opt-out, irrespective of whether they ever existed on the target system, and a date of less than three months will ensure that the starter records are created with a status of 'Opt Out'.

2. What should I do if an Opt Out re-joins the scheme?

   You must remove the 'Opt Out Date' from data item 52 and insert an 'Opt In Date' in data item 52. The 'Opt In Date' should remain on the payroll extract file each month.

3. How do I pro-rata the hours for term-time-only employees?

   Part-time hours must be pro-rated if the employee is term-time only. Two examples are provided below. Please check with your administering authority to ensure this complies with their own guidelines for pro-rating term-time service:

   - **Example 1 – Part-time, term-time only**

     Jennifer works for 12 hours per week during term time (full-time equivalent hours are 37). Her contract is for 39 weeks per year, plus 4.4 weeks' holiday, totalling 43.4 weeks. The following calculation can be used to pro-rata her hours:

     ```
     43.4 weeks/52 weeks x 12 hours = 10.02
     ```

     Jennifer's part-time hours should be supplied as 10.02 and her whole-time equivalent hours as 37.00.

Aquila Heywood

- **Example 2 – Whole-time, term-time only**

  Colin works whole-time during term time (37 hours per week). His contract is also for 39 weeks per year, plus 4.4 weeks' holiday, totalling 43.4 weeks. The following calculation can be used to pro-rata his hours:

  ```
  43.4 weeks/52 weeks x 37 hours = 30.88
  ```

  Colin's part-time hours should be supplied as 30.88 and his whole-time equivalent hours as 37.00.

4. Do we need to provide National Insurance earnings?

   This is entirely up to your administering authority. If your administering authority does not require you to supply National Insurance earnings each pay period, you must substitute the earnings with a zero.

   National Insurance earnings are not required after 5 April 2016, with the ending of contracting-out in April 2016.

5. Why do you ask for Taxable Earnings?

   The taxable earnings are used in conjunction with the date of birth for auto-enrolment purposes, to calculate the employee's worker category.

6. Why are payroll extract files with duplicate records rejected?

   This is because your administering authority records separate data on the target system for each active post on the payroll system, and there are one or more records containing duplicate combinations of National Insurance Number and the unique payroll identifier on the payroll extract file.

7. What happens if there is more than one part-time hours change in a single pay period?

   i-Connect can process only one part-time hours change in a single pay period. The latest hours change in the pay period, together with the effective date should be output to the patrol extract file. Any earlier changes within the same pay period should be communicated via a separate report directly to the administering authority.

8. How do I record part-time hours for casual employees?

   Part-time hours should be left blank if the employee is casual. Your administering authority will ask you for a summary of the total hours worked as part of their year-end process.

Aquila Heywood

9. My payroll system does not store all the elements required to calculate full-time equivalent pay (Data Item 55), for employees who joined the scheme before 1 April 2014 (England and Wales) or 1 April 2015 (Scotland/Police and Fire): are there any alternative values I can use?

   You should discuss the use of alternative values for data item 55 with your administering authority.

10. Why have salary validation errors been detected?

    This is because an annual salary is in data item 39, but an effective date has been omitted from data item 41, or vice versa.

11. One or more of my payees do not have a National Insurance number: what should I do?

    You will be unable to include the member on the payroll extract file until a National Insurance number is provided, as this is a mandatory field on your administering authority's target system. They may be happy to accept a temporary National Insurance number for pension administration purposes.

12. How do I record additional contributions?

    Cumulative additional voluntary contributions should be output to 'Additional Contributions 1' (data item 25), the cumulative values of all other additional contributions should be added together and output to 'Additional Contributions 2' (data item 26).

    Employer contributions cannot be stored on the target system.

13. What type of suspensions should I notify to the administering authority?

    You should notify your administering authority only of any unpaid breaks in service, for example, strike, maternity or paternity breaks.

14. How long should leavers remain on the payroll extract file?

    Leavers can remain on the payroll extract file indefinitely, although it is recommended that they be purged on a regular basis. Generally, leavers remain on the payroll extract file for an additional pay period after the leaver notification, to ensure that any arrears of pay (usually for claims based employees), are processed via i-Connect.

15. How do I record assumed pensionable pay?

    This should be included in pensionable pay (data item 40) and the main and/or 50/50 section cumulative pay (data items 53 and 54).
